

Criteria for review: CDIO Projects in Progress

The CDIO Projects in Progress track focuses on papers describing proposal, initial development, current activities, on-going process, preliminary results or particular implementations of CDIO principles without evaluation. It must be a **description that is interesting to other members of the CDIO community**. In formulating the criteria below, the aim was to ensure this.

Overall relevance	▪ Is the topic relevant and interesting for the CDIO Initiative?
Aim or problem	▪ Is it clear what the paper is trying to achieve, what problem it addresses?
Approach	▪ Does the paper adequately explain how the problem is approached? ▪ Are limitations discussed?
Conclusions	▪ Are the claims supported? ▪ Does the paper deliver a take-away message for the community?
Coherence and clarity	▪ Is the paper clearly and logically structured? ▪ Do the parts contribute to the whole? ▪ Is the paper readable and language appropriate for the audience? ▪ Are the APA guidelines and other formatting requirements followed?
